

What They About Us...

Thank you brothers and sisters for this very deep action which you took toward peace and reconciliation. Your logo is so beautiful and you appear to be really providential people for this task.

Thank you very much Edgard & Donna! I feel Black brothers and sisters have the keys to liberate our European countries and white peoples.

Thank you, yes, I am American too and we need this type of effort in the US. We need American leaders to be here as well.

I sincerely want to thank you and your team for starting this initiative. I attended from Canada and I am working with the BFM USA. So far here in the USA, we have not been able to start anything addressing this racial restoration on a national level. We have only had local group discussions. I would really like to talk about your initiative at our Zoom Sunday Service here in Western Canada. May I please read excerpts of Donna's speech or possibly show sections of the recording of the meeting today? Could you also ask permission to the band inTune if we may play their song at our Sunday service? If they allow it, could you send me a recording?

I am really hoping to inspire American brothers and sisters to connect to your organization so that in the future we can collaborate globally. Are you an official NGO?

Because our discussions are all happening locally, I don't know what many communities are suggesting. In our group of matching supporters, we talked about the idea of having a ceremony first with only church members, where the white members would make a full bow and a repentance speech on behalf of our race and ancestors. Then we would try to find African-American churches and ask their permission to do the same in front of their congregation.

I will spread information about "Concerned People" as much as possible to our leaders here in North America and hope for a very active participation at your next meeting.

May God bless you all and help us in this endeavour!

Andrea

PS. I know Gudrun from workshops in Edersee and maybe Francis remembers me

from MFT days in London? 

Please don't feel any pressure that I expect to be part of the committee. I would be happy to support in any way I can. Too often in our movement, it is expected that a "leader" has to be part of every activity.

I am not approaching you as a "leader" but simply as a concerned brother that deeply feels the importance of this project. If you don't want to expand the committee or even if you want to expand it with other people, I will not be hurt or disappointed or resentful. Heavenly Parent is guiding your committee and you should follow His/Her guidance and not act to please other people, myself included.

David
