

## Alpine Appliance Installations Ltd.

**“When Quality Counts”**

**Established in 1987**

**www.alpinecanada.com**

Thank you for requesting our services.

Alpine is a full-service company that uses a comprehensive stock of tools and specialized equipment for all installations to ensure against damage. We are able to assist with connections for ducting, plumbing, gas, electrical, and more.

If you are still in the planning or rough-in stage, we will gladly discuss and recommend proper service locations to meet manufacturer specifications. For smaller appliances (dishwashers, undercounter fridges, wine coolers, etc.) a cabinet handle is more than adequate for the panel.

For the sake of estimate pricing and installation efficiency, **please ensure the following have been completed prior to our arrival:**

- Cabinets installed with doors
- Countertops installed
- Sink and taps installed
- Electrical outlets in appropriate locations
- Plumbing and drainage available in appropriate locations
- Ducting roughed-in (we use hard ducting to make final connections)
- Appliances **MUST** be staged on the floor they will be installed on
- All appliance handles and panels at location (we will install handles and panels and make any required adjustments).
- Electricity and water connections be operational

**Please do not have the delivery company uncrate your products** unless there is a specific requirement for them to do so. This allows us to inspect the products for possible damage from shipping, as well as account for all small parts enclosed.

We run and test all products on site. We will contact and coordinate warranty should there be an issue with any of your product.

All product information and warranty cards are left in the main kitchen fridge for pick up. We can create and supply a custom product information packet binder for you as an additional service upon request.

We have access to full fabrication facilities for custom millwork, stainless steel trims, and cabinetry. See more at [www.sterlingstainless.com](http://www.sterlingstainless.com).

Please contact us with any questions or concerns.

We look forward to working with you on your project!
