Community Missions

Our community missions are the foundation of our organization's work. You will join our local volunteers to visit the people we serve, in their homes.

Delivering homecare supplies, executing basic exams, providing health education, encouraging healthy patient-provider relationships, and simply spending quality time are the main focuses of each mission.

Grade School Education

You will spend time in schools and with other organizations providing quality health education to grade school students in isolated communities of Puerto Rico.

Nonprofit Assistance

Everything is possible when we work together. Multiple days will be designated for joining other nonprofit organizations to assist them in impacting their communities. This work is dependent on the organization we are assisting and their specific needs.
