Lake Ozark, MO 65049

To whom it may concern,

In January of 2015 we contracted with Calvert Construction to do an addition to our house at Lake of the Ozarks. It requires more experience and knowledge to do a home remodel vs. new construction. Brent Calvert has the experience and knowledge to do a successful home remodel or new construction. With a home remodel there are many other things that must be considered. Brent goes the extra mile to be considerate to your neighbors and keep the job site cleaned up daily.

Brent builds the home as if he were doing it for himself. If something does not look right, he will call you to discuss instead of making a decision without you. I have never worked with a builder that pays this much attention to detail. Knowing that someone is looking out for your interest instead of trying to hide something before you see it is invaluable.

Brent is an honest and detail oriented person that we would recommend to anyone remodeling or building a new home. As a bonus Brent actually shows up to do the work as promised, unlike many other contractors at the lake.

Sincerely,

John Phillips
