

UFO IS THE CONTROL EQUIPMENT OF THE PLANET'S MIND

Attempts can be made to fly to Earth, but they cannot succeed – any biostructure when trying to approach the Solar System will be detected and destroyed by the Native Control System of the Earth. This is the secret of those who live at the expense of an unknown problem.

To begin with, everyone knows about the existence of UFOs. Some have seen them, some even “flew” in them, because whatever is written and said, **IS NOT SUPPOSED** to cause fear, much less - stress. **All of this is collected in a pseudoscience called Ufology.** And the flights to outer space at the present stage can be compared with the diminishing of the chalk as it writes on the blackboard – the chalk disappears after a certain number of letters. **NO ONE FLIES IN SPACE IN SUCH A WAY.** And they do not fly in space as shown in all kinds of films around the world and described in novels by those who are called science fiction writers, whose books and scripts are used to make these sort of films, but then, what do ufologists, contactees and researchers of this phenomenon “observe”?

The Planet's Mind Control Equipment

Our Universe, the world around us, the Earth itself **are the Systems that are created and controlled by nature itself in line with its laws, or artificially - by the Mind, which has reached an appropriate level of development.** And so that these systems, which are parts of the supersystem, could work synchronously in a single rhythm, **THEY HAD TO BE** synchronized with the beat specified by the controlling object - a Control System. There is no other way. Well, except perhaps, by God.

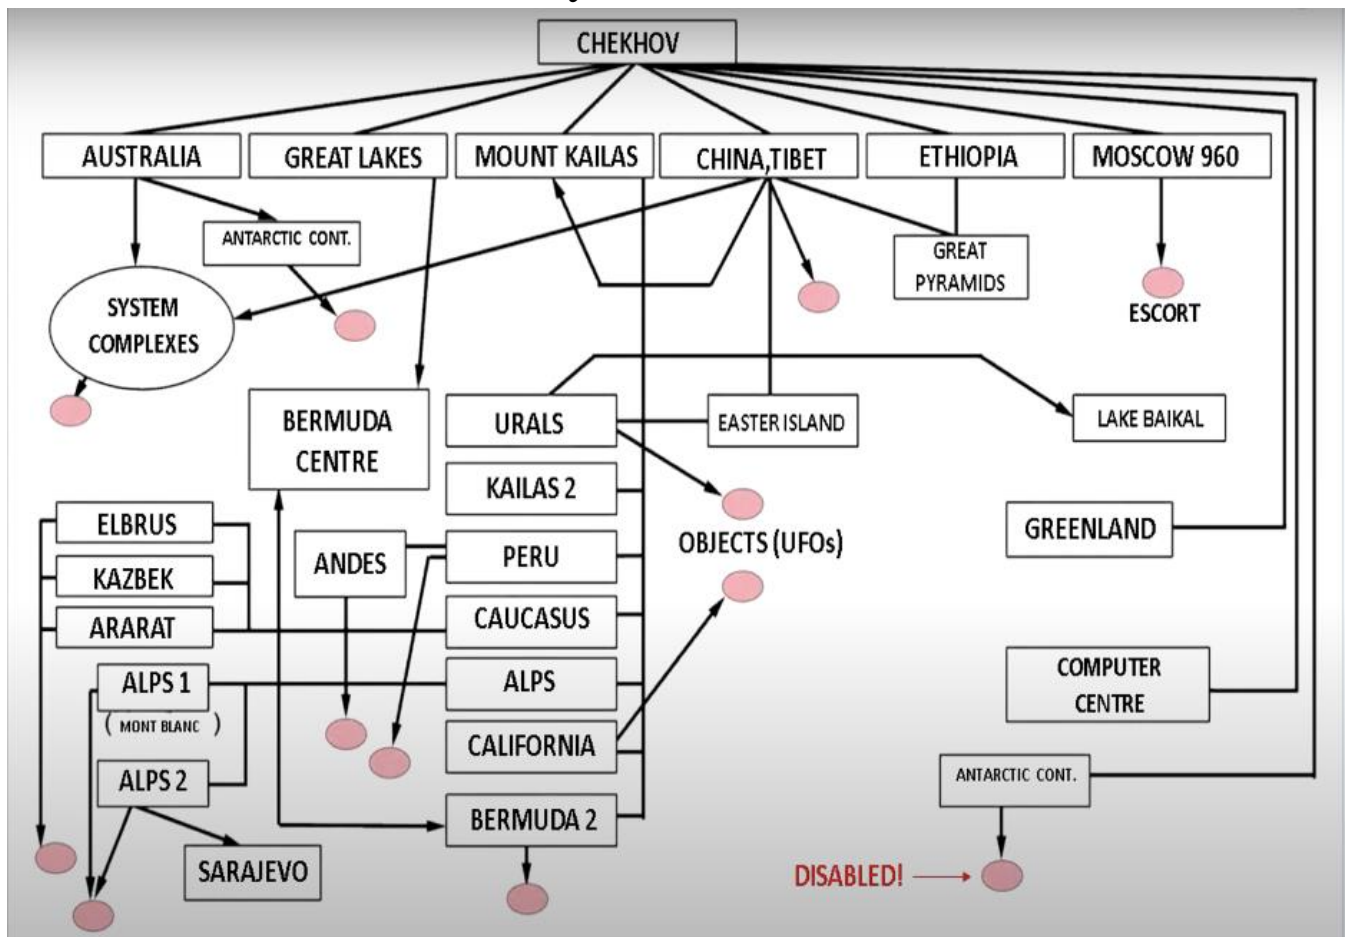

Our planet and the Earth's Control System (Pic. 1), which is located below the Earth's surface, were created billions of years ago and include not only

Control Complexes on Earth, but also on planets, planetary satellites and the Sun. The Control System is a complex hierarchical system located at an average depth of **$h = - 4,400$ meters** (from sea level).

There are also the Control System and the Earth Control Complexes there, as well as Control Systems, Energy Booster Objects, Retransmitting stations (devices), End Terminals, and **OBJECTS (UFOs)**. All the Earth Control Systems, as already noted, are synchronized according to the cycle set by the Sun, taking into account the movement of the Moon.

All this is interconnected not only among itself, but also with the Sun, the Moon, and the satellites of the planets. The Control System **WILL NEVER ALLOW** foreign starships to arrive from other planetary systems without destroying itself.

The Earth's Control System (Pic. 1)

In addition, the movement of any biological structures in space, including humans, is impossible – once they reach an altitude

of more than 430 km, they will, in a short time, become a pile of dust. Each person's basic Brain (matrix) permanently communicates with the Control System, and is stored in the archive of the Control System; at each clock interval (1.008 sec), the Brain is monitored and the information is recorded.

The Control System uses 7 types of time, one of which (60 * 60 * 24) is the clock interval of the atmosphere's lower level.

To transfer information, the Control System uses a musical series, and the spine resonant contours are information receivers.

The musical series for controlling the Human Brain are **DO RE MI FA SOL LA SI NA**, code LA LA LA **(666)** – callsigns for ***a specific Brain genotype 4XX*** plus the code from the magic square.

The Earth is governed by Complexes. The Main Complex, or the Earth's Control System, is located in Chekhov, near Moscow (see pic. 1). In Moscow, there is the Main Object (UFO), called the "carriage of kings", its ***conventional type is 960.***

The escort of this carriage consists of **12** UFOs located in Moscow and the Moscow Region. Conventional **type is 440** (it possesses laser weapons).

The complexes are divided into:

- ***the governing***, for example, the Complex in Australia makes Programmatic changes of the Earth's surface.
- ***the controlling***, for example, Kailas (Tibet) - controls the state of the biostructures' Brain.
- ***the supporting***, for example, Alps Complex - supports the genotypes created after 0 year.
- ***the "Computer Center"***, Ireland.

The so-called "computers" that are located there will work on Earth no earlier than in year of 2400.

- ***communication***, this Complex is in Ethiopia, communicates with the satellites of the planets.

- **weather**, for example, the Complex in Antarctica, located next to Mir station, provides a winter – summer shift.

All in all there are 48 Complexes on Earth. Seven Main Complexes operate in a daily cycle (each –for 1 day.) Therefore, there are 7 days in a week. The rest operate when they are needed.

The Complexes controlling the **OBJECTS (UFOs)** work separately - **rising and landing**. There are two of them - the first one is located off the coast of Chile and controls all sea-based OBJECTS; the second one is located **in the United States - not far from Chicago, about 200 km North-East of New York**, and controls all the other objects, creating **EXIT CHANNELS** and working conditions, as well as the **Great Lakes Control Complex**, 200 km North-West of New York. These Complexes coordinate and monitor the state of **all 7,909 mainland and sea-based OBJECTS (UFOs)**.

Their functions: upon request of the Main System, carries out the rising and landing of objects (UFOs). Under the upper layer of the Earth, there **are 3,672 mainland objects (UFOs), and 4,237 are sea-based UFOs**.

All complexes have **inertial and non-inertial masses**.

Modern science does not even suspect the existence of **a NON-INERTIAL MASS** (the structure of octaves higher than 64, united by octave

96), although ball lightnings and their effect have been known for a long time. **The entire control is carried out only through non-inertial structures.**

THE OBJECTS (UFOs)

All over the world people interpret **these objects as UFOs**. It should be noted that it is the OBJECTS (**a total of 980 types**) that are assigned a special function for directly controlling **individuals of a particular**

brain genotype, the so-called “Golden Billion”. UFOs of Earth origin are the equipment for monitoring the state of the environment (a type of weather balloon). ***UFO’s rising from underground to the surface takes about 12 days, they monitor the operation of structures on the planet,*** the state of the planet (**NOOSPHERE**), as well as the delivery of necessary resources to control structures. Thus, **NO ONE FLIES TO THE EARTH AND NO ONE IS ABLE TO ARRIVE.**

All that was observed before **2005-10-08-00-14** were the balloons lifting from the landing benchmarks (depth - 4100 - 4800 m) for the purpose of control. A new system with more than 3,000 objects (including planetary satellites, the Moon and the Sun) “arrived” about 18,000 years ago and has existed on Earth since that time.

UFOs do not fly long distances on their own (*to other galaxies*), they are transported inside a closed system (for example, the Moon). UFO movement does not depend on “weather” conditions. Total number of objects (UFOs) on Earth (in the System of Cubic Structures) is **3,264**. **The number of types is 128.**

Each type is designed to solve specific problems. Only objects that are not included in the cubic energy structure of the atmosphere suffer accidents. ***The Complex of the objects control is located in the Great Lakes region,*** northwest of New York. Some types of objects have **LASER WEAPONS**, **32** of them are guided by robots, and **2** types are guided by biostructures.

The main role in controlling the UFO system is played by the so-called “computer”.

The unit cell of a UFO computer is ***the “star of DAVID”***. When a charge is applied in any number system (3, 6, 12, 8), the star converts it into an 8-octal code.

Let me remind you that the command systems for biostructures, UFOs, and Control Systems work in various number systems. Without a command, not a single UFO will move. All initial messages until 2007 were transmitted only in English, after ***Easter 2007 - ONLY IN RUSSIAN***. The period of work is determined by the Time Control System (South Wales, England).

The interconnection of objects is carried out by a communication system. The antenna circuit (around the UFO) is able to communicate within the limits of the grid with fuel for movement. The UFO computer is used.

UFOs moving from beneath the Earth's surface have **a ball lightning** structure that is transformed upon completion of the movement into a material structure in the atmosphere layer of materialization (8,800 - 12,400 meters: (for understanding and comparison - insect infestations, rains of fish- rains of stones- rains of sand, materialization of Chebarkulsky meteorite, etc. – all this is a similar physics of the process), for all that –but traces remain - black spots on the Earth from **the UFO exit channels**, changes in the atmosphere (hurricanes), changes in the atmospheric grating density. As a rule, all UFOs have the property of transition to different optics.

The last example of the formation of UFO exit channels is **Hurricane Katrina** (USA) – 8 exit channels for the objects with index - **440 -1,548 - 1,346 - 6** (all destroyed). Sea-based UFOs do not have exit channels and can exist in the frequency range of the optics in

which they are observed. The formation of the channels is accompanied by some optical effects and the smell of sulfur.

Any UFO in space moves in the structure of the created grid. This grid has nothing to do with the atmosphere. In general, as already emphasized, UFOs are transported by the objects of the Moon type (inside the Moon there is everything necessary for that). This is when moving into a distant Cosmos (the distance is greater than from Earth to the Moon). When moving for short distances, a **channel** is formed, in it, first of all, an

environment is created in which objects will be located. Then, in the same channel, conditions are created for moving the object. A UFO does not fly twice into one point in space - there is no fuel there. What happens if anyone decides to visit Pluto in a modern spaceship? As it moves, high octaves will disperse (and these are the brain itself!), so when you reach Mars, you will have a Pithecanthropus brain, and at the end point - a pile of sand. All objects that move in space have a **gravitational magneto-electric (GME)** generator (a kind of a booster generator in case of an accident) that supports the existence of the moving matrices at all frequencies.

Approximately 66% of UFOs are **automated**, and play the role of control systems. UFOs with pilots are objects designed to fulfill certain tasks, for example, to **DESTROY CIVILIZATION** in northern Africa and create the Sahara desert (*the depth of “plowing” and transformation into sand is up to 50 meters deep*, and none of the scientists can intelligently explain why practically in all the deserts of the Earth the depth of the sand is 50 meters). The UFO pilots that are not intended to leave the UFO do not have systems such as a digestive tract, intestines, a reproductive system in their structure - when converting frequencies, the principle of minimal transformations was observed. For 12 days prior of

a UFO release into the atmosphere, all the necessary changes are made. You will never see a spider coming out of a UFO or something like that. If the contours of a human are visible under the spacesuit, this means only one thing - ***when landing, a human was captured***, and no one needs his brain, but only the body. Into that body the brain of a UFO pilot is “inserted” and is sent into flight.

The only structure that moves alone or as a part of the group of 6 UFOs are objects **346** (the control machines). When you hear that someone saw 9 UFOs, not 6, it reminds you of the optical effects of when there were 3 Moons or 2 Suns that have been observed by people more than once. Other types of UFOs move only one at a time, but there is a whole UFO staff for their movement, which is not optically visible - these are support objects (a type of escorts), refuellers, navigators, “catering” for spare structures, and so on. **This optical effect** is called **a pack of UFOs**.

All frequencies directed as an action function at the UFO are checked, and if some disparity is detected, all-round protection is turned on or the object that tried to influence the UFO is eliminated, for example, a radar or military aircraft, which has happened more than once and especially in the U.S.

None of the frequencies that UFOs use **COULD BE OBTAINED** by modern technical means on Earth - they are all based on prime numbers in the range of **1018 - 1044**. The frequency has the following properties: - in a 12-decimal system, the ending = BBB, in a 6-decimal system the ending of the same number = 555, in a 3-digit number system the ending = 222. In addition, there is always an adjacent +2, for example, 17-19. –Base

frequency is turning the function on, and adjacent frequency is turning the function off.

In addition to the above objects of various types, the sea-based objects (UFOs) of the conventional type **444 are specified**. They have their own bases (16 bases in total). They are intended for the analysis of the marine environment.

As mentioned earlier, sea-based UFOs **DO NOT HAVE** exit channels and can exist in the frequency range of the optics in which they are observed. When executing commands (movement), these UFOs use the energy reserve of octave 43.5 grating, which is also present in water. Each sea-based UFO can take out up to 12% of the grating potentials, therefore their exit is limited. When “flying out” of water into the atmosphere, a channel is created from a set of frequencies along which the UFO moves with conversion to additional material structures. UFO indexes are conventional. There are photographs of UFO’s exit channels, but no chemical analysis of the atmosphere has been made.

UFO Communication

Communication consists of sound signals in 8-octal numerical system (8 tones, a music note NA is added). These signals can be recorded. The code table (8 x 8) changes every lunar month. If the message is transmitted in a fuel medium and meets all restrictions, it is perceived as a normal

command. The text general analysis is performed on the base computer of the Ireland Control System, where the UFO Software Computing Center is located. Technical support for the information control and transmission

was carried out through objects of type 400, over which **ALL TEMPLES AND OTHER CULT STRUCTURES** were intentionally built.

Objects of type 440 have four types of transformation of their state:

- 1) the UFO rising and landing
- 2) territory stripping (all existing deserts are traces of the former civilizations destruction)
- 3) flying to the Moon and back
- 4) transporting "passengers"

After the corresponding transformations, the UFO will disappear (optically it will no longer be visible). The object itself, like a plasmoid, will descend to a depth of 4350 m and will be in the structure of the energy-information grating (this is a real photo of the

object - the Alps Control Complex). Upon the receiving of a command, the object rises to execute the command (including the use of laser weapons).

Alps 1 and Alps 2 Complexes have their own objects of **type 440**, which differ from the objects of type 440 in the ***Ural, Caucasus, Kailash and other Complexes***.

Energy-information channels connect each object with the corresponding Complex, with the Main Control System, with the Main Object Control System, and with the Booster centers (such as Bermuda).

Taking into consideration that all objects ***of type 440*** are of the continental base, their transients are more complex than those of sea-based objects.

The information on the objects' computers comes from:

- the Control System (12-decimal number system)
- other objects (6-decimal number system)

- Biostructures of *the brain genotype 42, 44* (3-digit number system)

The object of type 440 exit channel is a plasma channel, therefore the external circuit of the object at the exit or entrance has protection in a form of a plasmic indestructible ball (see picture on the left). On completing the transmutation according to the program, the UFO object

uses **EMG** generators (Electro-Magneto-Gravity) with its own reserve of the electric potential.

The fuel for all types of objects (UFOs) is Liquid Tritium. The reserves of tritium are not infinite, and it is not created by nature. Tritium exists in a liquid state at the temperature below -253 degrees Celsius. To create tritium, there are special installations (the Complex's generators) that produce tritium with its subsequent dissolution in water, and all objects (UFOs) are located near water reservoirs at the depth of 4,400 meters where sufficient reserves of tritium are stored.

All OBJECTS (UFO) are able to process water and extract tritium from it in the amount necessary to carry out the program. Tritium is necessary only for the UFOs movement within the Earth. ***Tritium exists only in non-inertial mass*** (energy structure), and only in fresh water.

Since 2012, the Unclaimed Objects (UFOs) of the interventionist Earth Control System have been blocked and “stuck” underground. If the Native ECS (Earth Control System), detects the object's attempts to move in a non-authorized manner, there follows a liquidation effect not on the

object itself, but on the exit channel created by the object. In this channel, which is created for rising or landing, as the object rises, the soil is being transformed in sections from the state of physically dense octaves to higher octaves (i.e., the lack of material environment - temporary dematerialization). It is such a process that allows an object to pass through the soil. The speculative consequences of such processes ***are observed as the disappearance of soil in vertical tunnels***. It is precisely these phenomena that are the cause of mass land holes and funnels appearing around the world. It is difficult to calculate the true number of such holes, because ***in the US state of Missouri alone, over sixteen thousand holes have been discovered so far!***

It has been a long time since attention was drawn to the formation of mysterious crop circles, which were perceived by ufologists as a message to earthlings from aliens who arrived on Earth. But, as it turned out, all circles, including the crop ones, are created by the Objects (UFOs).

All the UFOs on Earth are located at depths of ***-3300> h> -4400 meters.***

Sea-based objects do not create circles. If the Object is located under your house, it will create a circle, but no one will notice it; however, your own state of mind can change dramatically in transition from coming in from the outside to entering your home. The main part of the UFO is located exactly under the dwelling. The unexpected destruction of houses, the loss of the Internet or other communication troubles can also be associated with

the activation of UFOs, and this has nothing to do with space. All UFOs have laser weapons, which are also used for feedback from the Objects Control System through the atmosphere grating.

Before creating a “crop drawing”, all the outsiders are removed from the “canvas”. This is achieved by turning on the low-frequency generator (the type that created the “Flying Dutchmen”). It is not necessary to drive out the outsiders from the entire radius. When information about the absence of strangers appears to the Object, the message is transmitted (12 minutes). Upon completing the transmission, a picture is formed that confirms the Object’s location. By such a picture you can identify:

- Object type
- Object coordinates on the map of the Object Control System
- the exact message ("Chinese" symbols).

"Chinese" symbols are images, not letters. There may be a whole word or even a sentence coded in one image (hieroglyph). A drawing is a system of “hieroglyphs,” and through the grating of the atmosphere this image is transmitted to the Control System.

So, to summarize:

1. UFOs (Objects) – these are energy constructs capable of materializing and dematerializing using the capabilities of the atmosphere energy gratings ***at the altitude of 8,800 – 12,400 meters above sea level.***
2. UFO –this is the equipment for accounting, transmission and control of all parameters necessary for the Earth Control System operation.
3. UFOs are located in a static state at the depth of 4,400 meters. The main **location is UNDER SETTLEMENTS**. Before rising, the UFO creates a figurative message for the Control System, which we call "crop circles."
4. Most UFOs ***are equipped with laser weapons*** that can turn everything into sand to a depth of 50 meters. ***All deserts are UFOs' work destroying of a highly developed civilizations which for***

one reason or another could not be used as part of the interventionists programs to create specific Brain genotypes.

5. The underground UFOs are in the form of a **PLASMIC IN-DESTRUCTABLE BALL**. Rising to the surface takes place gradually over a period of 2 weeks. With its energy capabilities, the Object creates the exit channel by dematerializing the soil inside the channel 200-300 meters long, then the next 200 meters and so on, until it reaches the surface.

6. UFOs **HAVE NO POSSIBILITIES** to travel between planetary systems. Large planets such as the Sun and the Moon can travel between galaxies, carrying a large number of UFOs inside themselves.

7. The fuel for all types of objects (UFOs) is liquid Tritium. Tritium is necessary only for the UFOs movement within the Earth. All UFOs are located near water reservoirs, where at the depth of 4,400 meters, there are sufficient reserves of tritium. ***Tritium exists only in non-inertial mass*** (the energy structure), and only in fresh water. Here I want to note that a human brain cannot exist without tritium, which it receives from water! The expression "died of thirst..." does not correspond to reality. "The brain died due to the lack of tritium replenishment..." this statement is more accurate.

8. NO ONE CAN FLY TO THE EARTH AND NO ONE IS ABLE TO ARRIVE. Any biostructure in any starship will be detected and destroyed by the Earth Control System as it approaches the Solar system.

9. Some types of UFOs can be disassembled into parts, and then reassembled back into a single structure.

10. There were **7,909 (980 types)** of UFOs on Earth.

11. Most UFOs of the Old Control System ***are blocked and their control systems are switched off***. Currently, the Earth's Native Control System ***uses plasmoids, which are controlled and can operate only after the Control System gives the command***. Since 2012, all that people see "flying" in the sky and relate to UFOs (out of habit and not knowing) are plasmoids used by the Control System for various purposes!

12. Moving in space by any biological structures, including humans, is impossible – once reaching an altitude above 430 km, they will become a pile of dust after a short while.
