Certificate provided for your business to post with date of application.

FACTS YOU SHOULD KNOW:

- Our product is **EPA Certified** to be environmentally safe. It does not leach, contain heavy metals, triclosan, phenols, or other poisons. It is completely a water based product.
- The product used is odorless, colorless, and safe for contact with both humans and pets.
- The product does not compromise the safety of food or drinks and recommended for kitchens.
- The product provides an added level of long-term protection against damaging microbes such as bacteria, mold, mildew, viruses and other germs. It has a molecular bond and forms a micro-biostatic antimicrobial coating.
- The product has a highly durable, long lasting protective coating and will not wash off with cleaners or harsh chemicals.
- This is a **treatment**, not a cleaner or disinfectant. It is highly recommended to clean surfaces prior to this treatment in order for it to be more effective. This should NOT take the place of normal cleaning practices. If your location has been exposed to COVID19, we recommend our disinfectant spray first followed by this treatment.
- It is recommended to repeat the treatment after 90 days for most surfaces, and possibly every 30 days for certain areas depending on circumstances.
