Re: Water Testing

Jennifer,

Thank you for submitting a water sample dated July 2, 2018. We have analyzed the two samples labeled before and after treatment. The location was given as Utah Lake near the entrance to the park. The sample was received at room temperature.

You declared that the treatment was a new product containing bacteria for remediation.

Lake water untreated	5 PPM (mg/L) phosphate (PO4 ion)
Lake water treated	0.5 PPM (mg/L) phosphate (PO4 ion)

Please let us know if you require further testing.

Sincerely,

Bryon Tarbet Ph.D.
President - Prime 90™ Inc
