

# Pad Packs

\$14.99

Our Pad Packs were created when Susan Bonagura, Co-Founder of PinkLift, was having severe discomfort and skin blistering from radiation therapy. These specialized pad packs are created from a specially designed foam, and create an air pocket to provide relief of breast discomfort. Our pads work well to create symmetry of breasts after a lumpectomy or as a way to improve breast lift. They are available in size 1-8( A-H cup size), and come in a pair (two pads in each pack), and fit into our PinkLift Bras.
