popcorn nuggets with the best grape soda like flavor and a slight purple coloring. Adding NL improved the yield tremendously while keeping the great flavor, frost, and effects.

Gorilla Biscuit *Mostly Indica* *8-9 weeks* *f1 Polyhybrid*

Expect more OG body indica like effects. Large yields. Created by Mantis Medgrower.

Northern Light5 #8 *Mostly Indica* *8-9 weeks* *f2 Polyhybrid*

- '89 Northern Lights #5 "Noof Cut" x BCSC Northern Lights #5. Remember the Sensi Seed catalogs back in the late 80s, early 90s? If you don't, check out our "pictures" page on this website and you'll see what the Noof cut is. She's the plant in those pictures, the poster child of Northern Lights #5. Bodhi got a clone of this plant and crossed it to the British Columbia Seed Company Northern Lights #5 male he selected to rejuvenate the Northern Lights genetics. We open pollinated a pack of those seeds to offer f2 seeds (listed below) and some f2 selected cut here. These plants will get the classic NL "fade" resulting in pink, red, and yellow hues throughout. Beautiful, strong, and nice to breed with. Males in this line seem to increase yield and strength, while giving way to the females tastes, look, and effects. This #8 plant is a "chem" leaning pheno that will have the color fade and a nice, more electric, sativa like effects of the bunch. #12 is the skunky pheno. #31 is more chem like/fast grower.

Pineapple Thai *Mostly Sativa* *8-9 weeks* *f1 Polyhybrid*

- *Pineapple Thai Clone x Jack the Ripper*. This pineapple thai cross was made by 707 Seeds in Sonoma and the #8 plant has the exact smell and similar growth pattern of the original mom. The NL influence really re-awakens this classic Jack Herer line. Could be our biggest yielder too! This #1 plant is a dead-ringer of the original Jack Herer in Amsterdam from '98. Tastes like a lemon, black licorice and pepper fusion. Gives you a big time uppity high with a slight haze like the original. Great plant and super vigorous. Easy to grow for beginners. Shorter flower time than Jack Herer.

- Jack Light5 #3 (Passion Fruit cut)** *Mostly Sativa* *10 weeks* *f1 Polyhybrid*
- *Sannie's Jack x Northern Light5*. In house creation from our own Mantis Medgrower matching up our old school 1998 Jack Herer line from Sannie crossed to the Northern Light5 from Bodhi featuring the Noof cut from 1989. The NL influence really re-awakens this classic Jack Herer line. Could be our biggest yielder too! This #1 plant is a dead-ringer of the original Jack Herer in Amsterdam from '98. The Passion Fruit cut was a very pleasant surprise. Don't let the Jack like smell fool you. Each exhale finishes in a nice passion fruit flavor in your mouth. Really awesome. Similar soaring Jack high with some haze. Nice yields and grows more squat than the #1.
- '91 Christmas #5** *Slightly Indica* *9 weeks* *f1 Polyhybrid*
- *'91 Chem Skunk Va (Chemdog) x '79 Christmas Tree Bud*. Really cool cross from Useful Seeds that we expect big things from. This might be one of the best versions of Chemdog that you can find because of the influence of the Christmas Tree Bud from Pakistan. The Chemdog is reported to pop nanners (go hermaphrodite) if pushed to hard or stressed too much. We believe the Pakistani genetics might have helped with this and have seen no sign of nanners in our "torture chamber" grow room. Be careful though, this is strong meds and can stink up your entire neighborhood if you're not careful. If smell is something you are worried about, don't grow this plant!
- Cheese BX #8** *Mostly Sativa* *9-10 weeks* *Backcross*
- *Exodus Cheese x (Exodus Cheese x Aloha White Widow)*. Cheese is back! Along with the skunks, stinky cannabis is back in favor. Cheese is special, from Skunk#1 originally, and is the total package. It is mostly sativa, but a shorter sativa. Has an extra sharp cheddar cheese smell with big yields for a shorter sativa. It has pleasant smooth taste, a taste that makes you wanting more. An up high that helps with pain but doesn't pin you to your chair.
- Polecat BX** *Slightly Sativa* *9-10 weeks* *Backcross*
- *Chemdog '91 x SSSC Skunk 1 x (Chemdog '91 x SSSC Skunk 1 x Skelly Hashplant x SSSC Skunk 1)*
First offering from Duke Diamond at Dominion Seed Company - this is the backcross of their Polecat '91 which has received some great reviews in the grower community. Nice strong chem smells and nice tight buds. As with all Chem crosses, be careful not to feed too much or you could cause the plant to stress and intersex traits could appear. Should be more like the original Chemdog than the '91 Christmas and has a garlic like flavor.
- Pinball Wizard** *Mostly Sativa* *10-11 weeks* *f1 Polyhybrid*
- *Super Silver Haze x Wookie 15*. Another classic elite cross to the Wookie male from Bodhi. This is a more fruity version of the SSH with enormous yields and a similar sativa high to the Jack crosses. Quickly becoming an internet legend with the baseball bat sized buds you can get in a tent. Great strain for those looking for old Silver Haze strength with the Wookie taste in there.
- Dragon Af v2 #4** *Slightly Indica* *9-10 weeks* *f1 Polyhybrid*
- *Cosmic Serpent #10 x Kandahar Afghan*. First clone release of an Oklahoma made in-house cross using some stellar genetics. We release a limited number of these in seed form and now we have one of our selected plants from version 2 using the #10 mom. Vigorous plant with a soft sweet smell to her similar to Bounce dryer sheets and a slight skunky smell from the Afghan influence. You'll notice a big injection of vigor from these plants which means less veg time and larger yields. ***LIMITED TIME

Trey Way #2 *Slightly Indica* *8-9 weeks* *f1 Polyhybrid*
- *Black Triangle #3 x Kandahar Afghan*. Black Triangle brought on the indica "in the couch" like body stone to it with a slight sweet smell and some hash flavors with an ok yield. With this cross, we were looking to add a little more funk to the smell, more indica body feel, and improved vigor from the Kandahar. Looks like we found it in this plant. Try growing this next to a Kandahar Afghan to see the differences in the genetics. Bred in Oklahoma by Plant Time Genetics.

Strawberry Goji #4 *Slightly Indica* *9-10 weeks* *f1 Polyhybrid*
- *Goji OG x Strawberry Milk*. This is our Bodhi made strawberry strain entry in our "Strawberry Showdown." Almost guaranteed to put a new spin on the Strawberry strains. Goji is a very large yielding powerhouse of a plant crossed to his Strawberry Milk, with more Nepal OG influence. Watch out Strawberry Cough. Guerilla Fume' *Slightly Sativa* *8-9 weeks* *f1 Polyhybrid*
- *SilverChem x Chemdog 91 BX3*. From Lucky Dog Seeds "The mother in this cross is the SilverChem. She's a bulky Chemdog91 and Silverback OG Kush cross. Produces heavy thick buds that range from gassy to scorched earth. Very heavy hitting high that can be almost psychedelic in nature. Many people have told me that its the stoniest bud they have smoked and I cannot disagree."

Kashmir Sunshine *Mostly Indica* *8-9 weeks* *f1 Polyhybrid*
- *Kashmir Azad #22 x Sunshine Daydream*. Bodhi's selected Kashmir #22 must be a special plant and it's crossed here with his selected male from one of his most well know strains, Sunshine Daydream, which is showing promise as a very super fast growing unique specimen in this polyhybrid. Smells are blueberry muffin crossed with chem-carrot and spicy flowers. Super complex and should be great for terpy hash.

Frostbite *Mostly Indica* *9-10 weeks* *f1 Polyhybrid*
- *Too Buku #26 x '91 Christmas*. The unique terps from the Too Buku really match well with the diesel/pine smells coming from the '91 Christmas. Hard to describe but almost like a coconut pie that you dropped in a puddle of diesel and pinesol.

SkidMarX *Indica* *8-9 weeks* *f1 Polyhybrid*
- *Deep Line Alchemy 5 #13 x '91 Christmas*. Stinky dank is the name of the game here, featuring the 'skunk ass' pheno of the Deep Line Alchemy series & the Chemdog Christmas cross. Really cool genetics collide here and we're expecting big yields of stinky knock-down power herb here. Smells like cheeseburgers in a garbage truck. By Plant Time Genetics.
