SANGITA PEST CONTROL SERVICES PRIVATE LIMITED

Environmentally Friendly Pest Control Solutions Commercial and Residential

**Commercial Pest Control, Industrial Pest
Control, Household Pest Control, Herbal
Pest Control,**

COMPANY PROFILE

SANGITA PEST CONTROL SERVICES PRIVATE LIMITED began business as SANGITA PEST CONTROL in Paonta Sahib and Dehradun Uttarakhand, after licensing by the Uttarakhand Agriculture Department. The company has been under the licensed leadership of the present Management team since July 1, 2015.

We decided to extend our experience to Paonta Sahib Himachal Pradesh & Dehradun Uttarakhand in order to introduce Effective, Environmentally Friendly and Economical Pest Management practices. Sangita Pest Control Services employs Integrated Pest Management (IPM) approach to pest management; IPM is a process for achieving long term, environmentally sound pest suppression through the use of a variety of management practices. These practices include structural and procedural modifications that reduce pest access, food moisture and harborage within your environment. Chemical methods are applied only on an “as needed” basis. Need is determined by pest population monitoring and previous unsuccessful attempts to solve the pest problem with non-chemical strategies. Control products are placed where they are inaccessible to children, guests and staff.

Please Note: This is not “fumigation” (as fumigation does not solve pest problem), our service is environmentally friendly and it can be done even during business hours without having your employees/staff, family and visitors vacate the premises during service.

We have a reputation of solving pest problems while maintaining a Safe and Clean Environment for Effective Pest Solutions.

Our technicians are professionally trained to international standards and perform their duties with upmost integrity providing expert home pest control services and advice on pest management. Our specialties include Office Buildings, Residential Buildings, Private Houses, Hotels, Restaurants and Bars, Grocery Stores, Schools, Hospitals, Airport facilities, Warehouses, etc., ridding them of cockroaches, rodents, ants, termites, bees, snakes, scorpions, flies and other pests as needed. We also have a steady and reliable supply of modern-day State of the Art Pest Control products, technologies and best practices comparable to anywhere in the world. Based on our experience, we believe with our expertise at “Sangita Pest Control Services” we can help with effective pest management/control. Our service procedures include the Following:

- Inspection of the facilities to determine the level of pest infestation.
- Recommendations on Structural and Sanitation issues.
- Recommendations on a suitable IPM program for the facilities (Frequency of service).

We also recommend a one-time Pest Control Clean up service for new/renovated buildings before commencement of operation so as to get rid of pests that are already in the building and also to discourage pest entry and harborage.

We hope you will grant us the opportunity to solve your Pest Problems at surprisingly affordable rates.

Responsive and Local Service Sangita Pest Control Services is a company with local offices.

Integrated Pest Management a proactive program based on your needs and budget.

Sangita Pest Control Services identifies the causes of pest problems, which controls costs and minimizes material use.

Always Available We will work with your schedule. Pests work 24/7 and so do we.

National and International Coverage as part of Sangita Pest Control Services a Commercial pest control company, we service to everything from pizza shops to international food processors.

Your own dedicated service team trained, experienced and trustworthy. Sangita Pest Control Services helps thousands of businesses

Restaurants and Bars

Pest Control for Hospitality Businesses

Whether you run a bar, restaurant, take-out or eat in establishment, your most valuable asset is your reputation. Customers base this principally on food and service, but your customers also expect the highest level of cleanliness.

Mice, rats, flies and cockroaches pose a particular threat to hygiene standards in food preparation and storage areas because of their disease risk. However, there are a wide range of other pests that can spoil food or be a nuisance to your customers.

A STANDARD KITCHEN

Sangita Pest Control Services professional approach to proactive pest management protects food service businesses from pest problems. Your local technician will regularly service your premises to check bait stations, inspect for signs of pest activity, identify potential risks and advise you on steps that help prevent future pest problems.

If there is a problem, our rapid response commitment means that your technician will arrive quickly and deal with the pest problem to prevent recurrence.

If you coordinate multiple locations, these can all be combined into a single service agreement with an account manager to coordinate service while each individual location still has access to a local service tem

Hotels

Keep Out Unwelcome Pests

Proactive pest control is important for hotels not only because of their vulnerability to pest threats, but also because of the impact they can have on your hotel's reputation.

HOTEL ROOM

It is important to recognize that different parts of a hotel face different pest challenges. Sangita Pest Control Services will develop customized service programs to keep these areas pest free.

Kitchen and Dining Areas

Hotel kitchens, restaurants and other dining areas need particular protection from, **mice rats' flies,** and **cockroaches** all pests that pose a high risk of spreading disease. Proactive treatment is essential in these areas and will be expected by health inspectors. If pests are not adequately controlled, they will move from food preparation and storage zones into dining and other areas which may upset and disturb your customers.

Hotel Rooms

The biggest pest threats to hotel rooms are bed bugs and other biting insects.

Bed bugs are becoming a major issue in hotels in the world. All hotels are at risk, but especially those where there are large numbers of international travelers or those whose guests move frequently between hotels.

Prompt action is crucial early bed bug detection and treatment ensures that they do not spread to other parts of the building. In addition to simply treating bed bug problems, Sangita Pest Control Services can help you to train your staff to look for signs of bed bugs to ensure early detection.

Other Interior

Other areas of the hotel including sports facilities or back-of-house areas are at lower risk of infestation, but should be included as part of the regular service plan.

Exterior

Sangita Pest Control Services will also treat and prevent pest problems around the perimeter of your hotel including **wasp nests,** **bird** deterrence and helping to proof the grounds against other wildlife. Exterior treatment offers you some interior protection as well.

Integrated Service Programs for Hotels

Professional, proactive pest management from Sangita Pest Control Services is designed to protect hotels from pests with a customized plan based on specific threats and your particular needs. Your local technician will regularly visit your facility to check bait stations, look for signs of pest activity, identify potential risks and advise on any steps to reduce the risk of future pest problems. Bed bug inspections are a crucial part of our regular hotel service.

If there is a problem, we are committed to rapid response this means that your technician will arrive quickly and deal with the pest problem to prevent recurrence.

Multiple locations can be incorporated into a single service agreement with an account manager coordinating service across your hotels with each individual site having links to their local technicians and service team.

Supermarkets

Protecting Grocery Retailers from Pests

A supermarket is no place for a pest not just because of public perception and brand risk, but also because of the serious health risks particularly in areas where food is handled and stored.

Sangita Pest Control Services specializes in supermarket pest control. No other company can rival our experience of keeping supermarkets free of pest problems or dealing with them if they occur.

FOOD STAND IN SUPERMARKET

Our Integrated Pest Management program provides protection against pests. During regular service visits, your pest control service technician will fully inspect all areas inside and around the exterior of the store to identify any pest activity or risks and take action to address them.

Food Processing

Proactive Pest Management for Food Manufacturing

The production and packaging of food is a highly competitive industry that demands the most stringent quality and hygiene standards. In this environment, even minor pest activity is totally unacceptable.

Our proactive service is designed specifically for food manufacturers to ensure that pest activity will not compromise your standards or those of your customers and auditors. Sangita Pest Control Services is an Paonta Sahib, Himachal Pradesh & Dehradun Uttarakhand (India) Dept. of ISO, FDA certified company.

The service plan Sangita Pest Control Services develops is customized for your facility and will consider pest threats according to your method of food processing, the raw ingredients you use and your final food product.

Sangita Pest Control Services Technicians focus on prevention to minimize the risk of an infestation. They will work with you to define an effective approach and will advise you on practices and procedures that will reduce the risk of pests entering your facility.

Any treatment performed aims to minimize material use.

Offices

Preventing Pest Problems in Office Buildings

Pests in and around offices can greatly disturb people working in them. Pests can also damage buildings, electrical wiring and inventory with computer equipment and cables being particularly at risk from the gnawing of rodents.

BOARD ROOM

There are a number of factors that contribute to the risk of pest problems in an office:

Location (city, urban, industrial park, rural, etc.)

Age, construction and condition of the building

Size and layout of the offices

The type of goods stored in or near the offices

Whether food is served on site With so many variables,

each office building needs to be carefully evaluated to assess the pest risk and develop a customized pest program. Integrated Pest Management is a crucial component of a successful pest management program, and your local technician will regularly service your offices to check bait stations, look for signs of pest activity, identify potential risks and advise on any steps you can take to reduce the risk of pest problems.

If there is a problem, our rapid response commitment means that your Sangita Pest Control Services Technician will arrive quickly and deal with the pest to prevent recurrence.

If you are responsible for multiple office buildings, these can all be incorporated into a single service agreement with an account manager to coordinate service delivery across facilities while each individual site has access to their local technicians and surveyors.

Government Buildings

Keeping pests out of public property

As an expert in pest control, Sangita Pest Control Services understands the needs of those working in the public sector, regulated environments and not-for-profit organizations.

Government Buildings

While this describes a wide array of different environments, our approach is to provide a customized service to meet your specific needs.

With public buildings to run, public housing to maintain and government offices to manage, government organizations operate some of the country's largest property portfolios. They also have statutory obligations to find value in all the services they buy.

Sangita Pest Control Services can help federal, state and local authorities to meet these aims by providing best value for the protection of residents and public assets from pest problems.

In addition to pest control Sangita Pest Control Services Bird Control Specialists can protect many larger federal and state buildings, including International and Locals Airports from pest birds such as starlings and pigeons.

Whichever services we provide, the key differentiator is that we deliver effective, environmentally-sensitive and value-based pest control that contributes to the quality of life of residents.

We can help government agencies and facilities deliver cost-effective protection from pest problems.

Schools

Don't let pests detract from learning

Creating the right atmosphere for learning is hard enough without the added distraction of pests.

Not only do pests distract children but they can also pose a real threat to their health and damage school buildings of all types.

Sangita Pest Control Services develops effective pest management programs to keep schools and colleges pest free. Sangita Pest Control Services will conduct an in-depth evaluation of your facility whether daycare or a major university - and customize an appropriate pest management program.

If there is a problem, our rapid response commitment will mean that your local technician will arrive quickly and deal with the pest to prevent recurrence. You can be assured that Sangita Pest Control Services Technicians are skilled, experienced professionals they are required to participate in regular training programs to keep their skills and expertise sharp

Healthcare

Keeping Healthcare Facilities Free of Pests

Pest control service plays an important role in preventing secondary infection in all types of healthcare facilities including:

Hospitals

Orphanage Homes

Dentist's Offices

Specialist Clinics

Doctor's Offices

Hospitals and other healthcare facilities are busy and it is difficult to prevent rodents, flies, roaches and other insects from entering the building and thriving with the food and warmth they find there.

Pests are a serious threat in every environment but in primary healthcare the risk of cross-contamination is acute.

As an expert in pest control, Sangita Pest Control Services provides reassurance from pests to healthcare facilities and we are sensitive to the special needs of working in a healthcare environment. Sangita Pest Control Services Technicians are trained to maintain the highest standards in hygiene to avoid cross-contamination; they are sensitive to the impact of pest control service in public areas and will only use products best suited for the environment.

Sangita Pest Control Services range of non-toxic treatments can be used in high-sensitivity areas where traditional products are not allowed.

Sangita Pest Control Services has been working with hospitals, nursing homes, clinics, Doctor's offices and other healthcare providers for many years to anticipate and prevent potential pest risks. Our approach is to develop a protective barrier around the perimeter of the facility, use bait stations in higher risk areas and monitor and respond to any signs of activity.

If there is a problem, our rapid response commitment means that your technician will arrive quickly and deal with the pest. They will identify the root cause of the infestation and will advise on how to ensure against recurrence.

Residential Property Management

Keeping Apartment Buildings & Condominiums Pest Free

Preventative pest control is essential in residential property management - a pest problem in one apartment, left unchecked, can spread throughout the building carrying potential disease and infection. Once pests have gained access to a building, they need very little food and water to thrive and multiply!

A pest problem can negatively impact your occupancy rate and your facility's reputation. Sangita Pest Control Services proactive approach to pest control is the first step to pest management in apartment buildings and condominiums; we carefully inspect the property to assess the risk and prevent a pest problem from taking hold.

Your local Sangita Pest Control Services Technician will regularly visit your apartment building to look for signs of pest activity, resolve active concerns, identify potential risks and advise on steps you can take to reduce the risk of pest problems.

Using principles, Sangita Pest Control Services works with apartment building/condo managers and residents to help them make their homes less attractive to pests by following a few simple steps such as:

storing food in plastic or metal containers

keeping household garbage in closed bins and using compactors

trim vegetation from balconies, roofs etc.

keeping drains in good working order

ensuring basements are clean, dry and free of debris

If there is a problem, our rapid response commitment means that your Sangita Pest Control Services Technician will be with you quickly and deal with the pest to prevent recurrence.

You can also be assured that Sangita Pest Control Services technicians are skilled, experienced professionals they are required to participate in regular training programs to maintain their expertise. They also have respect for you, your home, your family and your time.
