JOB DESCRIPTION

In the lab, sort benthic invertebrates, organize benthic invertebrate data, and support overall laboratory success and efficiency.

In the field, assist in marine biology field work and the subsequent preparation of reports and other documents; potential travel throughout Marine Taxonomic Services' defined service region (Oregon; San Diego, CA; and Lake Tahoe), as project needs dictate.

All responsibilities done in partnership with, and under the direction of, an experienced Project Manager.

YOUR QUALIFICATIONS

Qualified candidates are enthusiastic, energetic, team-oriented individuals who hold, or are in pursuit of, a Bachelor's Degree in a science related field, with Junior level standing, or higher. Candidates should have excellent oral communication and computer skills.

THE DETAILS

Paid positions are on a limited duration employment basis (typically 6 months, June - November), with a varied workload of 24-40 hours/week.

Assignments are based in San Diego, CA or Corvallis, OR.
