

KLEENPAS SYSTEMS has created a Capturer & Kill Air Transfer Systems that will remove contaminants and odors from the air while killing 99.9 % (3-Log) of bacteria and viruses.

KPVK- 1500 can be wall mounted or set on the floor.

Our unique HEPA filtration system captures, kills and inactivates pathogens. HEPA filter is designed to filter particles as little as 2.5 microns.

KPVK-1500 uses the latest UV technology combined with

KLEENPAS proprietary (Patent Pending) technology.

KPVK-1500 can effectively treat 500 - 1500 Sq Ft. At 1,500 Square feet (8' Ceiling) it will do a complete air change out once and hour!

This model uses standard 115v electrical outlets.

Under normal room conditions the filter life is estimated at 90 days.

KPVK-1500 System will tell you when to change filter. System comes with two filters to get you started.

Estimate daily cost of filters = \$1.76 (Before Shipping)

Auto Ship Program is available at a discount.

HEPA Filter - \$160.00 each (Plus Freight)

Unit 16" x 10" x 26" – 20 pounds gross weight

MSRP \$1,400.00 (Plus Freight)
