

# **yura** BANJI SCOOTERS

## **Yura Banji Scooters COVID Safety Response** as of August 2020.

### **How We Clean and Disinfect Our Scooters**

We are committed to helping reduce the spread of coronavirus and enabling communities to better respond to and recover from coronavirus impacts. We clean every scooter in our fleet every time they return from use. At Yura Banji Scooters we follow QLD Health recommendations for cleaning, including:

- Disinfect all surfaces using approved cleaners.
- Wipe so that the surface remains visibly wet for five minutes and let dry.
- Focus on frequently touched areas.
- On our vehicles, this includes handlebars, brakes, throttles, etc.

Yura Banji Scooters is committed to only using Tier 1 Products recommended by the QLD Health. We conduct daily inventory checks and work with our suppliers to ensure facilities are appropriately stocked with these supplies.

### **What we are doing to keep riders safe:**

We have enhanced our cleaning methods and increased the frequency of cleaning and disinfecting our scooters. At all our locations, we are distributing hand sanitizer.

We ask riders to stay safe and take the necessary steps to help protect themselves and our communities as advised by QLD health officials.

- Take precautions - inspect the scooter to make sure the wheels, brakes, throttle, lights, and frame are all in good, working condition.
- Wash your hands or use hand sanitizer which is at least 70% alcohol-based when you arrive at your final destination.
- Wear gloves when you can.
- Ride Solo - for safety and social distancing; maintain a distance of at least 6 feet from others.
- Identify - travel in bike lanes where available and be aware of traffic lights, and uneven riding surfaces.
- Vigilance - ride in well-lit designated areas while also remaining alert of your surroundings and potential safety hazards.
- Essential Rides -remember to follow your QLD regulations and public health orders when riding.

**What riders can do:**

As with all shared surfaces, we understand sanitization is only one component in addressing COVID-19 health concerns. Ride solo for safety and social distancing and practice appropriate hand hygiene. Please wash your hands or use at least 70% alcohol-based hand sanitizer before and after every trip.
