

METAL DISINTEGRATORS

MINI MAG

Fixture for disintegrator head for portable precision applications

Brings quality into tight corners to solve tough extraction problems

Compact enough to fit through an 18" circle

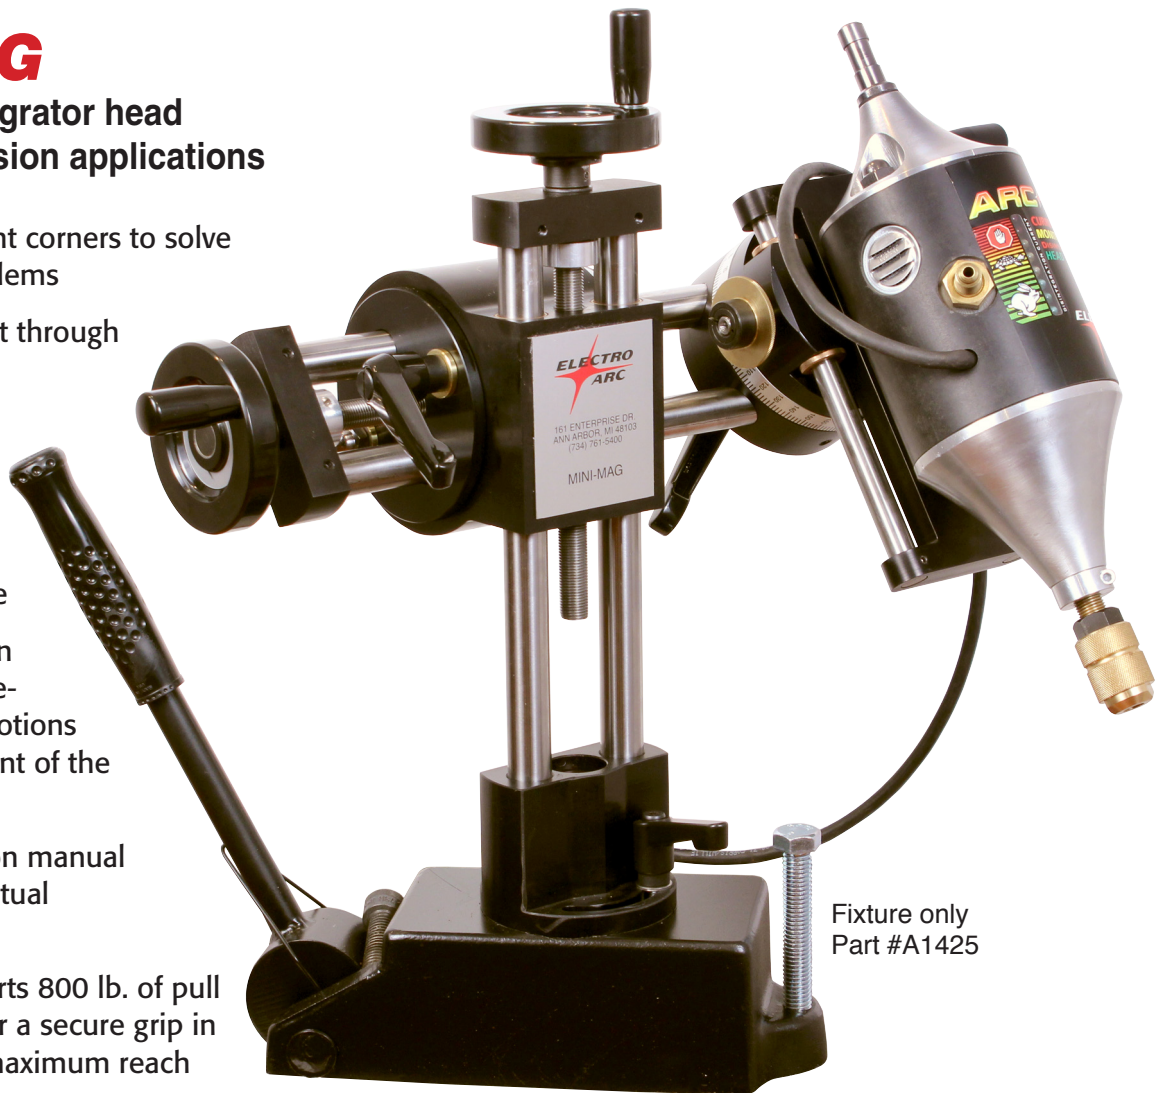

Weighs only 40 lb., just 12.5" long

Six precision movements provide operation at any angle

2 axes of 360° rotation marked out in 1° increments and 3 linear motions allow precise alignment of the cutting path

Precise rack and pinion manual feed provides 4" of actual disintegration depth

Magnetic support exerts 800 lb. of pull on ferrous surfaces for a secure grip in any orientation and maximum reach

Fixture only
Part #A1425

Arc'er head shown not included

OPTIONS

Remote
Start/Stop
Part #A3258

Vacuum base
Uses shop air pressure to anchor to non-ferrous surfaces such as stainless steel, aircraft aluminum or even plexiglass.
